MariHacks 7.0

Overview

MariHacks is Montreal's first and largest **24-hour hackathon for CEGEP and high school students**. Organized by **Marianopolis College** students and hosted on campus, we expect to bring **over 200 people** from all over the country together to prototype their innovative ideas and push their creativity forward. We strive to foster a learning environment that is both challenging and fun for all hackers, from novice programmers to seasoned coders. We're back for our **7th edition** this year with one goal in mind: to make this hackathon the best of all hackathons!

Why Hackathons

Hackathons provide passionate learners with the opportunity to explore the endless possibilities of the world of computer science by **building awesome projects** alongside fellow students who share similar interests. The workshops offered throughout our event allow even complete beginners to **acquire new skills** and to apply them to build a creation they are truly passionate about.

Why You Should Sponsor Us

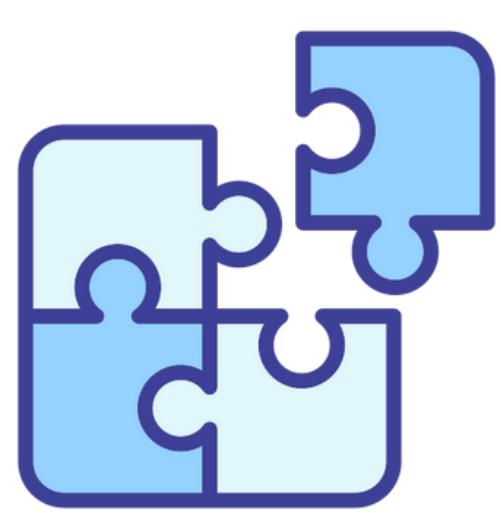

Sponsoring MariHacks is a fantastic way to establish **powerful connections** and increase **brand awareness** by reaching a large audience of **young tech enthusiasts**. By making MariHacks possible, you are also empowering hundreds of students to reach their full potential and shaping **tomorrow's leaders** of the technology industry.

What We Need

In order to host a **fun and enriching hackathon**, we need to provide hackers with everything they need to perform their tasks and have an enjoyable experience. From **digital tools and equipment** to **prizes, snacks, and entertainment**, hackathons are quite expensive and that is why **we need your help!** All funds and contributions are directly invested in MariHacks itself to make our event the most awesome possible!

How You Can Help

Sponsor a Challenge

Define a hackathon category and award a challenge prize to a project in line with your research interests.

Bring Company Engineers to Mentor

Mentorship is an excellent way for your company to interact directly with students throughout the event.

Provide Solutions to Hackers

You think your products can help our hackers create better solutions? Hook them up with an API or other service!

Host a Workshop or a Talk

Host a technical or non-technical workshop during the hackathon. It could be on your company's API, a yoga session, or any service your company provides!

Sponsor a Prize

Reward the hard and amazing work of the MariHacks participants with awesome prizes, such as tech gear, bursaries, office visits or internships.

Send Company Promotional Items

Whether it be t-shirts, stickers, or water bottles, anything goes! Developing brand recognition with participants is an extremely effective way to promote your company.

Anything helps!

We're open to any other ways you'd like to help us, so feel free to reach us out to team@marihacks.com.
